

Getting A WebSales XML Feed URL

Agile Ticketing provides a quick and easy way to integrate the Agile ticket purchase process into your website. In order to start this process, you will need to get a WebSales XML Feed URL that will provide an XML formatted list of your events. Follow the instructions below to find out how to find the URL.

1. Open the **Web** Folder in your organization and select the **Entry Points** icon.

2. Find the **Entry Point Group** and **Entry Point** for which you want to get an XML Feed. This Entry Point's **Type** must be some kind of **List**. Right-click that item and choose **Properties** from the menu.

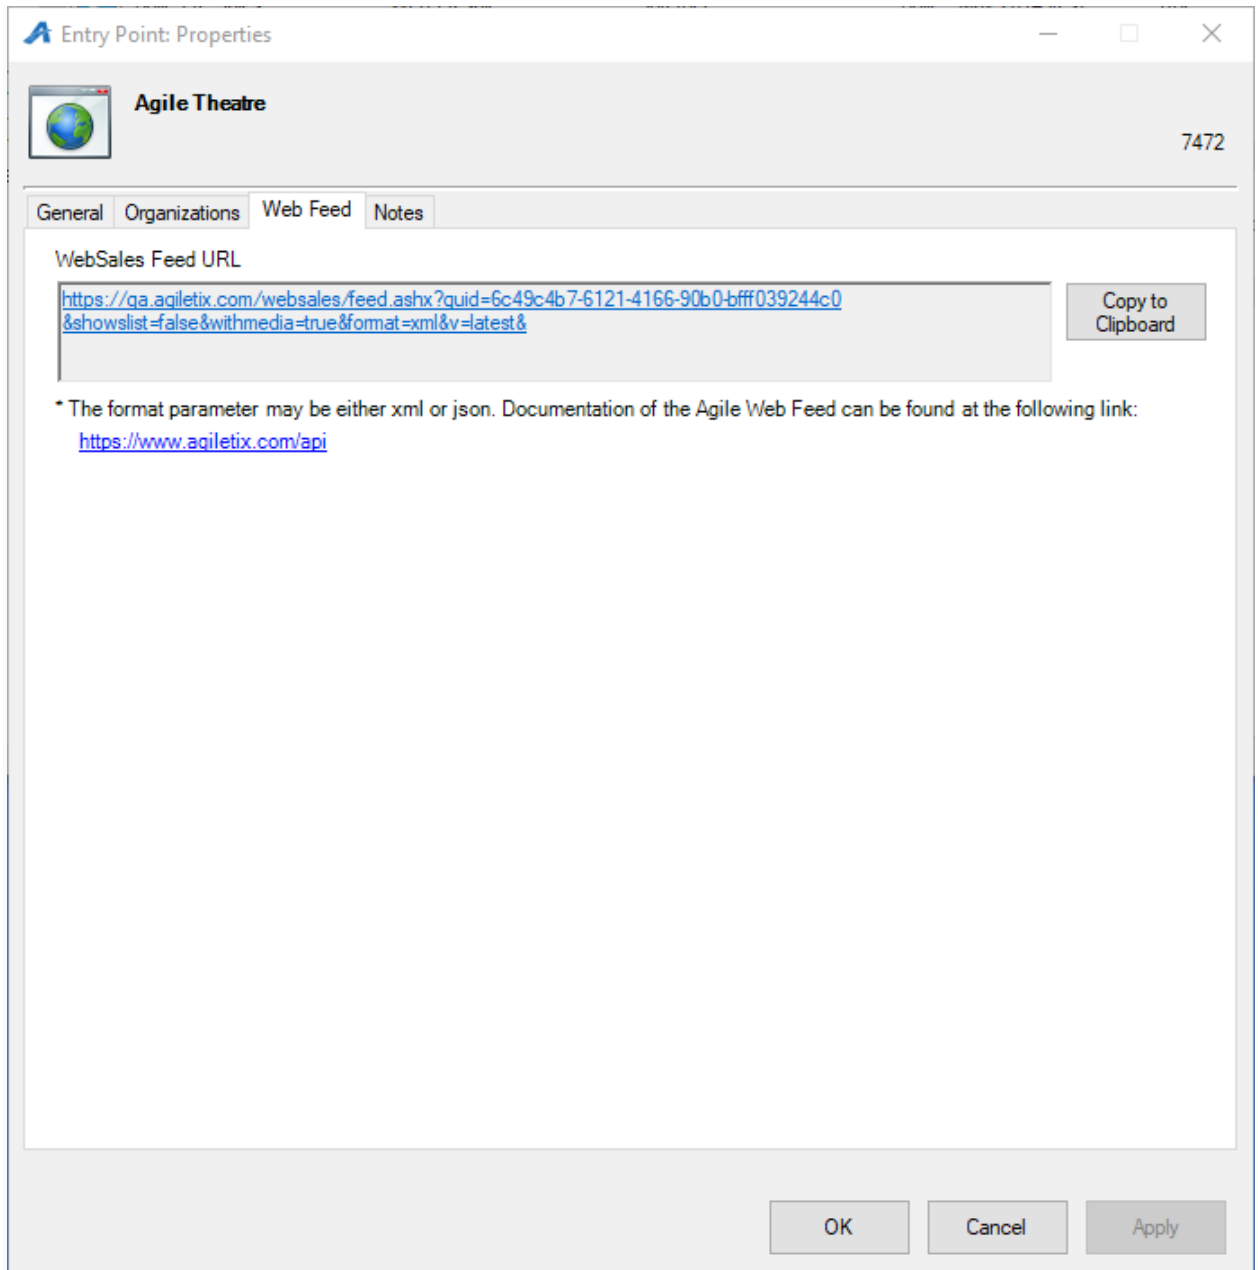

Entry Point Group	Entry Point Group Name	Sales Channel	Type	Skin	Enabled
	NowPlayingNashville XML...	Web Standard	Internet	Agile - May 2014 [res]	True

Entry Point	Entry Point Name	Display Group	Sequence Number	Type	DisplayType	Enabled
	Film		0	Event List		True

A context menu is open over the 'Film' entry point, showing the following options: New, Properties (highlighted), Delete, Copy Shortcut, and Open in Browser.

3. This will bring up the **Entry Point** settings. Click the **Web Feed** tab to find the URL.

You can click on the URL to view the current XML Feed or click **Copy To Clipboard** to get the URL in your clipboard.

If you need any additional assistance finding out how to use the XML feed, please
